DETAILED ACTION

Claim Suggestions

- 1. In claims 1 and 12, line 11 of the claims, after "axial direction", it appears that the word --and-- should be used to make the claims make sense.
- 2. In claim 14, line 2 of the claim, after "wherein", "the coil spring" is not referenced in claim 12. It appears that it should be dependent upon claim 13.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 12-14, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Nielsen US 4,635,683.

Nielsen discloses a fixed core 28, a cylindrical movable core 22 and 24, a valve member 10 for reciprocating in an axial direction of the movable core in a cooperative manner with the movable core to open and close a fluid path, a coil 26 for forming a magnetic field by electrical conduction thereof to attract the movable core to the fixed core so as to move the movable core in the axial direction; a guide member 38 for guiding the movable core in the axial direction from inside or outside of the movable core in its a coil section radial direction, and a plurality of support members 32, 34, 30, and 36, provided so that rigidity of the movable core in the radial direction is higher than that in the axial direction (this is accomplished by the thickness of the

Art Unit: 3751

spring 32 in the radial direction as opposed to the thinness of spring 32 in the axial direction): for supporting a plurality of portions of the movable core in the axial direction, respectively. One of the support members is either a coil spring 30 that has a decreasing diameter from one end to the other or a flat spring 32.

Allowable Subject Matter

- 5. Claims 1-11 are allowed.
- The following is an examiner's statement of reasons for allowance. The primary reason 6. for the allowance of claims 1-11 is the guide wall is elastically deformable and deflects through a space in the radial direction of the guide wall in combination with the device as cited in the rest of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's 7. disclosure. Koga and Tatara disclose an electromagnetic valve with a guide member and a plurality of support members on the movable core with the rigidity being higher in the radial rather than the axial direction. Gilmore, Schechter, and Chumley disclose coil springs with decreasing diameters.

Art Unit: 3751

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Bastianelli whose telephone number is (703) 305-0058. The examiner can normally be reached on M-F (9:00-6:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Huson can be reached on (703) 308-2580. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
